

**AMENDMENTS ABSTRACT OF THE DISCLOSURE**

Please replace the Abstract in its entirety with the following paragraph:

BELT SANDER

A belt sander includes a body element and a non-driven roller arranged proximate the body element. An electric motor having a stator and a rotor drum is arranged proximate the body element. The rotor drum defines a driven roller. The electric motor is operable to provide rotatable motion of the rotor drum around the stator. A belt is supported around the non-driven roller and the driven roller. A casing is arranged between the non-driven roller and the driven roller. The casing includes an adjustment mechanism operable to change a distance defined between the non-driven and driven rollers.
